SYSTEMS AND METHODS FOR FACILITATING THE PRESENTATION OF INVENTORY ITEMS

ABSTRACT OF THE DISCLOSURE

The invention provides systems, structures and methods which facilitate the display of inventory items. In one exemplary embodiment, the invention provides a system which comprises a plurality of separate stores. An elongate wall separates each of the stores. Additionally, each wall is provided with a doorway, with the doorways of each wall being aligned with each other. An aisle passes through each doorway such that a customer may visualize at least some of the interior of each store while standing in the aisle and looking down the aisle.
